

Messié – Zooplankton hotspots in a moving ocean

Monique Messié, Monterey Bay Aquarium Research Institute
J. Fiechter (UCSC), J. Santora (NOAA), F. Chavez (MBARI)

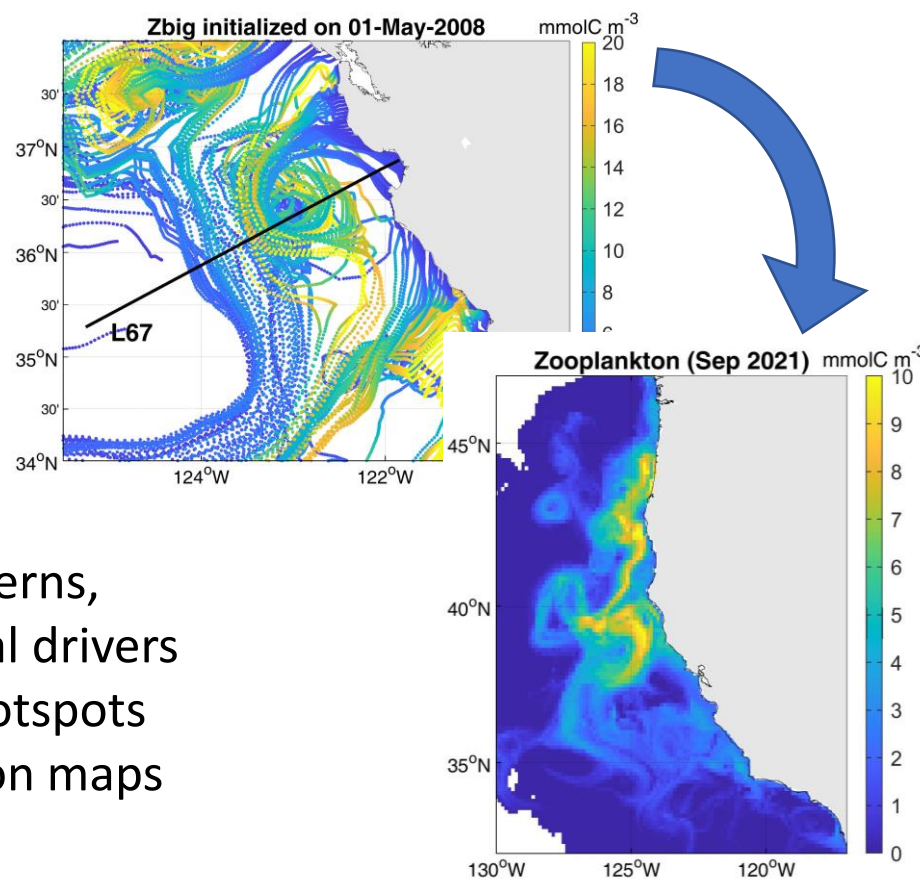

Coupled physical-biogeochemical model

- Krill hotspots location, seasonal patterns, interannual variability, environmental drivers
- Links between krill and ecosystem hotspots
- Monthly satellite-derived zooplankton maps 1993-present available online

Satellite-based growth-advection model

Yearly krill & ecosystem surveys
